

March 8, 2020

Dear Parents,

I just want to give you an update of what we are doing here to keep our kids as healthy as we can. I met with the cleaning crew and they are sanitizing doorknobs, water fountains, faucets, etc. and other common areas. The cafeteria tables are sanitized between each lunch period as they have always been. While in the cafeteria I think the kids think I've lost my mind since each time someone asks to go to the bathroom, I remind them to "wash their hands really well and hum happy birthday twice" before they finish! We will continue to be vigilant. Please don't send sick kids into school. Attendance has been good so far.

The teachers, myself and our tech "guru", Bill Riedell met to discuss ways we can continue delivering lessons, if God forbid we have to close. We are confident that with all our technology; google classroom, different apps and online classes, this is possible.

Two things I need to know if it applies to you – please call me if you do not have internet access in your home and let me know if you have traveled abroad.

Sincerely,

*Sister Merris*
